Thur. Feb. 1 <sup>st</sup>	<b>US History Exam 9:00 am</b>	--	--
Fri. Feb. 2 <sup>nd</sup>	--	--	--

**NOTE:** All Grade 10 exams are 2 hours except for Essential Math (1 hr). All exams will be written in the Eddie Cass Gym. Any student with accommodations that they have discussed with their counselors will write in the Aulneau Room at that time.

## STUDY SUGGESTIONS:

1. **This schedule can be adjusted according to your personal needs.** It is only a guide. Decide which subjects need the most review and adjust the schedule accordingly.
2. In your first study period of a particular subject you should **organize your notes**, make a list of the topics you need to know and draw your attention to areas that will require more time and energy to master.
3. In subjects that have a lot of content dealing with terms, descriptions and other memory work, create a list of terms or a set of summary study notes/cards. In subjects like Math, do sample problems of the type you may find on the exam. **Concentrate on teacher review worksheets and comments during review classes leading up to the examination period.**
4. If you are studying *only* one subject, then you should **study it for at least two hours**. If you decide to study two subjects, study each one for 45 min to 1 hour, give yourself a SHORT break and then get back to it!
5. **By rule of thumb...take a 10-minute break** for every hour of study. Do not watch TV during the break or get side tracked otherwise you will find it difficult to get back on track!!!
6. If you play music during studying, *make sure it is only background music and not music that will distract you*. Your study environment should **exclude anything** that will be a **distraction**.
7. Have someone help you study by quizzing you before/after you have completed a period of study. This is where flash cards, self-prepared mock tests/specific questions and other self-assessments can be very helpful. Re-write an old test!
8. On the Exam Study Schedule, **stroke off each of the study periods you have completed!** This will give you a visual picture of all that you have already done and give you a sense that you are getting the tasks done!
9. Tutorial classes provide a great opportunity. Come prepared with specific questions and concerns that will allow your teacher to help you. Tutorials **ARE NOT** provided to re-teach concepts. **MOST** tutorials are 90 minutes in length.
10. Email or message your teacher if, at any point during your studies, you have questions or concerns. **DO NOT** expect an immediate reply though.
